ORGANISATION NAME:

- Name of organization :
- Timeless Reads
- History of the organization:
- The bookshop started in 2023 with the goal of creating a welcoming place for people who love reading. It began as a small independent store focusing on classic literature and educational books. Over time, it grew including modern novels, children's books, and other genres, as well as stationery and literary gifts. The bookshop also hosts events like book signings, reading sessions, and community workshops, making it a club for local readers. Today, it combines the traditional in-store experience with an online platform, allowing customers to browse and buy books easily while keeping its reputation for friendly, personalized service.

- Mission and Vision statements:
- Vision: To be a well-known bookshop that offers a wide range of books, fun events, and makes reading easy and enjoyable for everyone.
- Mission: To give people a friendly place to find and enjoy books while encouraging a love of reading.

- Target Audience:
- The bookshop's target audience comprises of children, teenagers, adults, students, teachers, and book enthusiasts. It serves anyone who enjoys reading and collecting books, attracting individuals interested in storybooks, educational materials, novels, non-fiction, and specialty books, along with events like book signings, reading sessions, and workshops. Overall, the audience is diverse and appreciates a welcoming space for exploring literature.

- WEBSITE GOALS AND OBJECTIVES:

- The bookshop website is made to help the bookshop become more popular on the internet. It will get customers and make the bookshop closer to the customers it already has. The main things the bookshop website will do is to help people find the bookshop when they use search engines and social media sign up for newsletters join a loyalty program and buy books or things with the bookshops name on them online.
- The bookshop website will tell people about the books the bookshop has books that come in events and where the bookshop is. It will also show what is special about the bookshop, like how much the bookshop loves reading and helps the community.
- The bookshop website will have things like ordering books saving a spot at events and letting customers tell the bookshop what they think about the shop, its events or the things it sells. These things make customers feel like they are part of the bookshop and want to come which helps the bookshop get bigger and do well.
- To see if the bookshop website is working the bookshop will look at how many people visit the website, how pages they look at and how many new people come to the website. The bookshop will also look at how many people sign up for the newsletter join the loyalty program or buy things online.
- The bookshop also needs to look at how people stay on the website how many pages they look at and where they come from like social media or online ads. What customers say about the website will also show if people like the website and trust the bookshop.
- All this information will help the bookshop understand if the website is working and if it is helping the bookshop grow. The bookshop website is a help for talking to readers telling people about books and making the bookshop more successful. The bookshop website is important, for the bookshop.

PROPOSED WEBSITE FEATURES AND FUNCTIONALITY:

- DESIGN AND USER EXPERIENCE:

- The Bookshop website is designed to be an inviting and user-friendly space for visitors. It aims to provide easy access to information about books, events, and services offered by the Bookshop. The color scheme features a cozy espresso brown for headings, warm cream for highlights, light beige for separation, dark brown for the main text for readability, and olive green to enhance creativity and freshness.
- For typography, Playfair Display will be utilized for headings to maintain a stylish appearance, while Open Sans or Roboto will be employed for the body text to ensure ease of reading. The content is structured using various heading levels: H1 for the main title, H2 for significant sections like New Arrivals or Events, and H3 for subsections such as book categories, facilitating quick navigation.
- The overall layout will be clean and organized, following a grid design that includes a header, prominent images, featured book sections, and other essential areas. Aesthetic elements like spacious design and visually appealing images of books and reading spaces will contribute to a pleasant user experience.

- TECHNICAL REQUIREMENTS
  -The bookshop website will require a hosting platform, a domain name and a database to store book and customer information. The website will be developed using HTML, CSS, and JavaScript for the front end. The website will allow users to browse books, search for titles or authors, and administrators will be able to manage book listings and inventory securely.

- Milestones and Timeline
  -The development of the bookshop website will follow several milestones within a planned timeline. In the first week, the project will focus on planning and identifying the websites goals and requirements. In the second week , the design phase will take place where the website will be built using web technologies and the book database will be set up. In the forth week , the website will be tested to ensure all the features work accordingly and all errors are fixed .

- BUDGET:

-The budget cost will include costs for purchasing a domain name, web hosting and web development tools may sum to an approximate of R20000 to R100000. Additional expenses may include design software, database setup and security features which will help protect user data which may cost R3000 each. The budget should also allow for testing, maintenance and future updates to ensure that the website runs smoothly and continues to meet customer needs.
